

Product Release Announcement

Latest Software Release Notes, November – December 2022

Issues Fixed

Asset Search:

- Provided 'Asset Search' on the top navigation bar.

Accounts:

- Accounts Routing and Approval introduced.

Exports:

- When exporting Organization Reports, the score was not being exported. This has been fixed.
- Provided the **User Created On** field on the export of users from lists as well as other pages.
- Export of Organizations from the Setup > Organizations was not providing the Score. This has been fixed.

Editors:

- Selecting the wireframe and navigating to the Editor was not working. This has been fixed.
- In Email, when "Download HTML" is done, it will create an HTML file and provide it as a downloaded file.

Lists:

- The smart lists based on eBook activities were broken. This has been fixed.

MDF:

- MDF requests can be searched by Organization External ID on the MDF Request Approval page.

Notifications:

- Partner Registration: If the User already exists then the system will send a notification email.

Playbooks:

- Provided "Blog templates" for Non-contact Centric and Linear Playbooks.
- If a playbook is deleted, the playbook URL won't load.
- Sales Playbooks: Provided the functionality to add notes in the Step-wise View.

Permissions:

- Available video gallery activities are now configurable based on permissions.
- Emails for Certification completion will be sent to the user even if the email template used in the Certification template is not shared with the User.

Reports:

- When the social drip report of another user was checked from the Social Drip Summary Report, an error message would pop-up. This has been fixed.

Social Posts:

- Provided the options to set the featured image for Blog Post.
- Videos introduced in Social Campaigns.

Setup:

- Provided a static tab for Verticals/Industry Types for Organization.
- Provided the action of "Switch User" to Site/Super Admins on the User grid actions.
- The user will not be allowed to delete/shut down/lockout himself.

Search:

- The search filter by alphabet name was not working. This has been fixed.

UI & Consistency:

- Updated the 'Name' column of the lists to have auto-width.
- 'Expected Close Date' for Opportunity on the grid was not being displayed based on User Time Zone. This has been fixed.
- The UI issue in pagination has been fixed.

**Usability:**

- Removed the cursor as a pointer from the drip status label.
- Provided character limit which will be displayed for fields of playbooks, courses, and curriculum.
- On the 'User Role' page, made the action, on the click of the button instead of the whole row.

View Assets:

- Asset preference was not working in **view assets**. This has been fixed.
-

***NOTE: AMP refers to Automated Marketing Platform (Mindmatrix) software.**
