Product Release Announcement
Latest Software Release Notes, April – May 2022

Issues Fixed

Announcements:
- The announcement, when edited and saved, was not saving the changes. This has been fixed.
- 'Announcements' will now be displayed based on 'Sharing'.

CRMs and Third-Party Integrations:
- General:
  - Contact interest status, when updated to hot from drip step, was not getting pushed to CRM. This has been fixed.
  - Imported Contacts converted to partners will not be pulled again to AMP.
- SFDC POD:
  - In contact, Lead and Opportunities the AMP URL will open in iFrame.
- ZOHO:
  - Converting opportunity amount with respect to integrator currency, if integrator currency and opportunity currency are different has been implemented.

Contacts:
- Super Admins in the Base Company can convert a shared contact to a user irrespective of whether the Super Admin is the Owner.
- Removed the option for selecting CSV/TXT or Email for importing Offline Activities.

Drips, Lists & Scoring:
- Organization Lists that are broken will be struck out in the grid.
- Provided User Smart list condition, User Drip Condition, and User Scoring rule based on "Redeem Requests".
- More conditions for Company User smart lists like syndicating social media, syndicating a web asset, uploading a document implemented.
- "Push to CRM" has been introduced as an action for contact smart list, recipient list, and company contact list.
- On the Drip Media page, after creating a template, immediately performed actions like delete was not working. This has been fixed.

Dashboards:
- Opportunities amount will be displayed as per the User's currency unit in the Deals widget.
- The linear playbook widget was breaking if the user completed some steps. This has been fixed.

Editors:
- We hid the Print media (PDF) ID and displayed the original name in the preview.
- The content text of 'alert' was getting trimmed on saving and reloading. This has been fixed.

Imports:
- The 'Owned By' field was not appearing in mapping when the User permission is "NA". This has been fixed.

Localization:
- Implemented the localization of the Asset Configuration tab/category.

MDF:
- Provided export for MDF Fund Plans.

Notifications:
- Multiple notifications were being sent for a single failed social post. This has been fixed.
- The red dot on the Notification Manager icon will now be displayed for unread notifications.
- All the mandatory fields are provided in the Deal Registration Notification email.
- In the MDF system notification email as well as Advanced Search list emails provided the CTA to "view request".

Opportunity:
- Provision to assign Product Database records with Opportunities implemented.

Profiles:
- Company Profile was not loading for some Company Users. This has been fixed.

Reports:

- Curriculum Summary Report introduced.
- Provided the Medium/Low count on the 'Drip campaign stats'.
- The organization report was not working when the user selected any organization group instead of all or none. This has been fixed.
- Organization stage's checkbox values were not reflected in the Organization report. This has been fixed.
- Individual Drip Report of the user other than the logged-in user was broken when accessed from Drip Summary Report. This has been fixed.
- Period range data was inconsistent in the Asset report and the User report. This has been fixed.

Setup:

- In Organization, data of the score was not matched on the grid page. This has been fixed.
- 'Save' was not operational on the Sharing page of the Social Drip template. This has been fixed.

UI & Consistency:

- Responsive design for login page implemented.
- In the Playbooks, the LinkedIn icon was not appearing. This has been fixed.
- Emails were not responsive when opened in the Gmail app on Android devices. This has been fixed.
- Restricted expansion of text area fields within the modal container in the Social Post page.
- View Asset: The selected folder will be highlighted with the company color to make it more prominent.

Usability:

- On the email send page, provided the confirmation message for sending emails immediately.
- Added a direct link to the export page in the message and made it display for more than a few seconds.
- ToS Page: Made the "I Agree" more prominent.

User Session:

- After the User Session expiry, it will redirect to the login page, instead of showing the login screen on the page loaded.

V5:

- Key stats are provided on the 'Manage > Opportunities' page.
- Provided the link for gallery items on the unified view page.

View Assets:

- The search was not working as expected. This has been fixed.

---
