Product Release Announcement
Latest Software Release Notes, June - July 2022

Issues Fixed

Browser:

- The 'Valid To' field was missing in MAC-Chrome when a user edits any template. This has been fixed.

CRMs and Third-Party Integrations:

- Connectwise:
  - Exposed Primary Contact in contact filter criteria.
- Dynamics:
  - Organization domain names will be synced with Mindmatrix.

Dashboards:

- The users in the Organization count were not displayed in the "Partner activity and Organization stats" widget. This has been fixed.

Editors:

- The Japanese language showed additional characters in the template preview when used with the percentage (%) sign. This has been fixed.

Lists:

- Provided a User's Company in the notification of the Smart list.
- Exposed the "Set Persona" field for the "Update User Info" action of the User Smart list and User Drip.
- Text changed for Smart list notification page as requested.

Learning Management:

- Provided "List View" for Courses and Curriculum, with actions for multiple selections.

Notifications:

- Deal Registration: When the Admin user navigated to the "Opportunities" folder from the notification email of the Deal Registration, it showed an error. This has been fixed.
- Provided complete data in the smart list notification email instead of trimming.

Playbooks:

- The drip node in the Sales playbook gave an error. This has been fixed.

Profile:

- In the "Activate Social" tab, under profile, if the user switches the failed notification to OFF/ON for Blogger only, then it was not being saved. This has been fixed.

Reports:

- Playbooks report: Provided the User list on click of the count for "Users in Step".
- Bounced report for User email implemented.
- Sorting in the Asset Report gave an error. This has been fixed.

Social Posts:

- In Social, One-off, few modifications were done for Scheduled posts.

Third-Party Integration:

- Google Drive: Files synced from Google Drive will sync the thumbnail also.

UI & Consistency:

- Key stats on the 'Setup > Organizations' page implemented.
- Disabled the previous date in the Social One-Off message scheduling.

Usability:

- Form object usability changes done.
- Text Object usability issues fixed.

View Assets:

- The folder showed inconsistency when My favorites, Recently used and Recommended tabs were visited. This has been fixed.
- Special Characters in the document name of the PDF of the Document Gallery gave an error on viewing. This has been fixed.

---

*NOTE: AMP refers to Automated Marketing Platform (Mindmatrix) software.
